

### ENGINE

4 Cylinder 4 stroke continuous duty  
Standard engines available in India  
Spares & maintenance easily available

### DESIGN & CONSTRUCTION

Modular concept for easy accessibility  
Lubrication points provided standard  
Heavy duty framework for rugged use

### TRAILER SPECIFICATIONS

Chassis frame made of MS sections  
Semi elliptical leaf springs & Axle  
Heavy duty tyres of 600 X 16 size  
Efficient brakes & jack legs provided.  
Suitably treated for anti corrosion

### PUMP

Centrifugal type.  
Capacities of 2000 LPM to 6000 LPM  
Pressures from 7 bar - 10 bar available  
Safety features as per latest standards  
Coupled to engine via flexible coupling  
Suction inlet of 100 mm dia. standard  
Discharge outlet of 63 mm standard

### PRIMER

Exhaust ejector / reciprocating primers  
Priming from 7Mtrs. within 21 seconds

### ENGINE

Diesel engines starting at 60 BHP  
Engines are 4 stroke, fuel efficient engines  
Alternator for charging onboard batteries  
Cooling system of Indirect open circuit type  
The exhaust discharges away from operator

### FUEL TANK

Fuel Tank suitable for min 2 hrs operation  
Stainless Steel or corrosion protected steel

### MISCELLANEOUS

Suitable spaces for suction & delivery hoses  
Space for other ancillary equipments  
Oil bath lubrication & accessible drain  
Can be lifted with the help of a crane  
Conveniently placed fuel filling ports

### OPTIONS AVAILABLE

1. Delivery side accessories
2. Suction side accessories
3. Water Ring Priming system

### OTHER OPTIONAL EQUIPMENT

Details of all other optional accessories and equipments which can be fitted on Trailer Mounted Pumps are available on request. Please contact us on the below mentioned contact details and we will be happy to help you
